REEBOK FITNESS APP

TRACK YOUR WORKOUT

The Reebok Fitness app allows you to track your progress via Google Maps.

You can switch the view between map, satellite, flyover and street view.

The treadmill's elevation level will automatically adjust to match your programmed route, or if you are using a bike or cross trainer, the resistance level will automatically adjust accordingly.

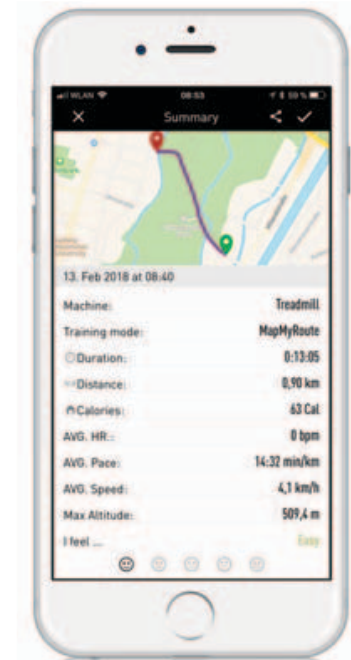

ANALYSE YOU TRAINING

At the end of your training session, the app shows you a workout profile, giving you stats such as distance covered, calories burned and average pace.

You can add personalised notes to your workout profile such as how challenging or hard you found the workout.

The training history page allows you to review your previous workouts and stats such as total number of calories burned.
